Office Action Summary	Application No. 10/519,575	Applicant(s) ARROUPE ET AL.	
	Examiner Dennis H. Pedder	Art Unit 3612	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 December 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22 is not clear as to whether all the limitations of claim 12 are included. This claim should be rewritten in independent form if the total combination is intended. In order to distinguish from claim 12, motor vehicle structural details must be recited in more than the preamble. See KROPA V. ROBIE AND MAHLMAN 88 USPO 478 (CCPA 1951). The claim in its present form is therefore also rejected under 35 USC 112, fourth paragraph as not limiting the subject matter of claim 12.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various

Art Unit: 3612

claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 12-18, 21-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawasaki (cited by applicant) in view of any one of references A-I, and Biesinger et al., cited by applicant.

6. Kawasaki has the cross member with nut 44(alpha), screw 49(beta), and cage 47(beta), the latter preventing perpendicular movement.

7. Any one of references A-I and Biesinger et al. teach that prior to the invention of applicant, it was known in this art to fasten a nut within a cage that allows floating movement of the nut in a perpendicular direction to the bore axis. Such freedom of movement allows for tolerance compensation within members to be fastened together.

8. It would have been obvious to one of ordinary skill to provide in Kawasaki a floating nut cage to replace the cage of Kawasaki as taught by any one of references A-I and Biesinger et al. for that reason.

9. As to claim 13, Kawasaki teaches welding.

10. As to claims 14-15, screw fastening, crimping, are not only common knowledge in this art to fasten members together, but obvious to use here to enable fastening without welding equipment.

Art Unit: 3612

11. As to claim 16, sleeve mounting is also common knowledge in the art of tubular members.

Applicant may seasonally challenge, for the official record in this application, this and any other statement of judicial notice in timely manner in response to this office action. Please specify the exact statement to be challenged. Applicant is reminded, with respect to the specific challenge put forth, of the duty of disclosure under Rule 56 to disclose material which is pertinent to patentability including claim rejections challenged by applicant.

As to claim 17, see plate 40b of Kawasaki.

As to claim 18, see spacer 45 of Kawasaki.

Allowable Subject Matter

12. Claims 19-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dennis H. Pedder whose telephone number is (571) 272-6667.

The examiner can normally be reached on 5:30-2:00.
